Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT.
 1. Document US-A-3 677 443 (hereinafter D1) discloses a method of dispensing ice cream product comprising filling a container (10) with ice cream product (14), transporting the container to a site at which the ice cream is to be dispensed, locating the container in a dispensing apparatus and discharging the ice cream product through an outlet (18) of the container (10), whereby the container has two compartments, said compartments being gastightly separated from each other by an at least partly movable wall (see. Col. 3, l. 38-50), one of the compartment containing a propellant and the other (12) containing the ice cream product, compartment 12 being provided with a valve (18).
 2. It must be concluded that all method features in the wording of claim 1 are known fromm document D1. Consequently, the novelty requirements of article 33(2) PCT are not met.
 3. The attention of the applicant is also drawn to the fact that the claim 1 in the present formulation does not exclude that the propellant can come from a source outside the container, so that all the documents cited as X in the search report can be considered as novelty destroying at least for the subject matter of claim 1.
2. A positive International Preliminary Examination Report with regard to the subject matter of dependent claims 2-4 can only be issued if such claims refer to an independent claim which meets the requirements of PCT with regards to novelty and inventive step.
